Literature of Insanity & Medical Metaphysics,

INTERESTING TO ALL ENGAGED IN THE

TREATMENT OF LUNATICS, AND THE MANAGEMENT OF ASYLUMS.

Published Quarterly, price 3s. 6d.

*** *The Journal is addressed specially to those anxious to advance* PSYCHOLOGICAL SCIENCE, *to improve our knowledge of the* TREATMENT OF INSANITY, *and to promote the* AMELIORATION OF THE INSANE. *Established in* 1848.

THE JOURNAL

OF

PSYCHOLOGICAL MEDICINE

AND

MENTAL PATHOLOGY.

EDITOR AND PROPRIETOR,

FORBES WINSLOW, M.D., F.R.C. PHYS. ED.

UNTIL the publication of this Journal, in 1848, those in this country connected with the treatment of insanity and the management of lunatic asylums, had no periodical specially representing their important interests. The establishment of a magazine devoted exclusively to the reception of papers and the discussion of questions relative to the HUMAN MIND in its many MORBID CONDITIONS had long been a desideratum. THE JOURNAL OF PSYCHOLOGICAL MEDICINE was started with the hope of occupying the vacant space existing in the periodical literature of England. It has been the object of the editor to take a wide and comprehensive view of medical psychology, and to open to the profession a new field of philosophic research, believing that the man engaged in the study and practice of medicine has higher and more noble functions than those connected merely with the consideration of the *material* part of his organization; that, to properly appreciate disease, and to be fully competent to administer to the alleviation of human suffering, it is essentially necessary he should be acquainted with the influence of the many spiritual agencies that are constantly producing, aggravating, and modifying bodily and mental disease. Garth feelingly exclaimed:

> "The healing art, now sick'ning hangs its head,
> And once a *science,* has become a *trade.*"

It has been the earnest desire and aim of the Editor of the 'PSYCHOLOGICAL JOURNAL,' to cultivate in the profession a taste for the study of the more spiritual part of the science of medicine, from a strong conviction that, in proportion as the medical practitioner becomes acquainted with the laws regulating the union of *spirit* and *matter*, *mind* and *body*, will he place the science which he cultivates on high vantage-ground, and thus *command* for the noblest of all pursuits, the admiration, respect, and support of the public.

BOOKS REVIEWED.

On Mental Derangement. By Dr. Seymour.

The Human Brain. By S. Solly, Esq., F.R.S.

Report of the Commissioners in Lunacy to the Lord Chancellor, 1847.

Clinical Facts and Reflections; also, Remarks on the Impunity of Murder in some cases of presumed Insanity. By Dr. Mayo.

The Consciousness of Right and Wrong; a just Test of the Plea of Partial Insanity in Criminal Cases. By Dr. Robertson.

A Treatise on the Physical Cause of the Death of Christ. By Dr. Stroud.

Statistics and Pathology of Mental Diseases. By Dr. Webster, F.R.S.

Observations and Essays on the Statistics of Insanity. By Dr. Thurnam.

The Construction and Government of Lunatic Asylums and Hospitals for the Insane. By Dr. Conolly.

Fourth Annual Report of the Managers of the State Lunatic Asylum, near Utica, New York. By Dr. Brigham.

On the State of the Insane and of Lunatic Asylums in Switzerland. By Dr. Hungerbuhler.

Baron Rolfe's Charge to the Jury in the Case of the Boy Allnutt, who was tried at the Central Criminal Court, for the Murder of his Grandfather, on the 15th December, 1847.

A New View of Insanity: the Duality of the Mind, &c. &c. With an Appendix. By Dr. Wigan.

Religious Insanity, illustrated by Histories of Cases. A Contribution to the History of the Religious Errors of the Age. By Dr. Ideler.

The Principles of Medical Psychology. Being the Outlines of a Course of Lectures. By Dr. the Baron von Feuchtersleben.

A Treatise on Chronic General Paralysis, considered especially as affecting the Insane. By Professor Rodrigues.

The Power of the Soul over the Body, considered in Relation to Health and Morals. By Dr. Moore.

The Third Report of the County Lunatic Asylum, at Hanwell, Middlesex, for 1848; and also of Edinburgh, Dundee, Lancaster, Aberdeen, Bedford, Crichton, Staffordshire, Kent, Cumberland, Suffolk, Bethlem, Retreat, for 1847.

L'Effet d'Emotions politiques dans la production de la Folie. Par M. Belhomme.

On Poisons in Relation to Medical Jurisprudence and Medicine. By A. S. Taylor, F.R.S.

The Use of the Body in relation to the Mind. By Dr. Moore.

Practical Hints on the Moral, Mental, and Physical Training of Girls at School. By Madame de Wahl.

The Principles of Mental Psychology. Being the Outlines of a Course of Lectures. (Second Notice.) By Dr. the Baron von Feuchtersleben.

The Night Side of Nature. By Catherine Crowe.

The Philosophy of Magic. By Eusebe Salverte.

A World of Wonders. By Albany Poyntz.

Communications with the Unseen World.

On Dreams, in their Mental and Moral Aspects. By John Sheppard.

The Philosophy of Mystery. By W. C. Dendy, Esq.

General Collections
P
2146
22502698621

On Puerperal Insanity. By JAMES MACDONALD, M.D., formerly Physician to the Bloomingdale Asylum for the Insane, New York.

Insanity tested by Science. By Dr. BURNETT.

Observations on the Proximate Cause of Insanity. Being an Attempt to prove that Insanity is dependent on a Morbid Condition of the Blood. By J. SHEPPARD, M.R.C.S.L.

Essay on Moral Theology, considered in relation to Physiology and Medicine. Designed especially for the Clergy. By R. J. C. DEBREYNE, Doctor of Medicine. Fourth Edition.

The Natural History of the Human Species: its Typical Forms, Primæval Distribution, Filiation, and Migration. By Lieut.-Colonel J. H. SMITH, K.H.

Facts and Arguments on the Transmission of Intellectual and Moral Qualities from Parents to their Offspring. New York.

A Practical Treatise on the Causes, Symptoms, and Treatment of Spermatorrhœa. By M. LALLEMAND. Translated by H. J. MCDOUGALL, Esq., M.R.C.S.E., Fellow of the Royal Medico-Chirurgical Society.

The Influence of Clothing on our Organs. A Deformity of the Cranium, resulting from the common method of Covering the Heads of Infants. By Dr. A. FOVILLE, Senior Physician to the Asile Départmental des Aliénés de la Seine Inférieure.

The Cerebral Affections of Infancy and Childhood. (Prize Essay.) By Dr. DUKE.

General Principles of the Philosophy of Nature, with an Outline of some of its recent developments amongst the Germans; embracing the Philosophical Systems of Schelling and Hegel, and Oken's System of Nature. By J. B. STALLO, M.A.

The Idea of Life. Hints towards the Formation of a more perfect Theory of Life. By S. T. COLERIDGE. Edited by SETH B. WATSON, M.D.

On Death. In the "Cyclopædia of Anatomy and Physiology." Edited by R. B. TODD, M.D.

An Apology for the Nerves, or their Influence and Importance in Health and Disease. By Sir GEORGE LEFEVRE, M.D.

History, Description, and Statistics of the Bloomingdale Asylum for the Insane, State of New York, America. By PLINY EARLE, M.D., Physician to that Institution.

On Insanity, considered in a Pathological, Philosophical, Historical, and Judicial point of view, from the revival of the Sciences in Europe, to the Nineteenth Century: a Description of the great Epidemics of simple or complicated Insanity, which attacked the people in former times, and prevailed in the Monasteries; with an exposé of the judgments which unrecognised Insanity has led to. By L. F. CALMEIL, M.D., Physician to the Asylum at Charenton, and Member of the Legion of Honour.

An Essay on the Use and Abuse of Restraint in the Management of the Insane, including some Remarks on the Origin and Nature of their Disease; with copious Notes. By HAMILTON LABATT, A.B., T.C.D., Fellow of the Royal College of Surgeons of Ireland.

Torquato Tasso—Crichton Institution Biographies, or Memoirs of Mad Philosophers, Mad Kings, &c. No. I. Dumfries.

Elements of Electro-Biology, or the Voltaic Mechanism of Man: of Electro-Pathology, especially of the Nervous System; and of Electro-Therapeutics. By ALFRED SMEE, F.R.S., Surgeon to the Bank of England, to the Central London Ophthalmic Hospital, to the Royal General Dispensary, &c.

A New Exposition of the Functions of the Nerves. By JAMES WILLIAM EARLE.

The Brain the sole Centre of the Human Nervous System. By EDWIN LEE, Surgeon.

The Closing Years of Dean Swift's Life; with an Appendix, containing several of his Poems hitherto unpublished, and some Remarks on Stella. By W. R. WILDE, M.R.S.A., F.R.S.C.

Sleeplessness in Disease. Lecture LXIX. in the Clinical Lectures on the Practice of Medicine. By ROBERT G. GRAVES, M.D., M.R.I.A. Second Edition. Edited by J. MOORE NELLIGAN, M.D., M.R.I.A.

Lunatic Asylums, Ireland. Report on the District, Local, and Private Lunatic Asylums in Ireland, 1848; with Appendices, presented to both Houses of Parliament, by command of her Majesty.

The American Journal of Insanity. Edited by the Officers of the New York State Lunatic Asylum, Utica. Vols. I. to V. Printed at the Asylum.

The Fourth Report of the Committee of Visitors of the County Lunatic Asylum, at Hanwell. January Quarter Sessions, 1849.

Unpublished MSS. of the late Dr. WIGAN.

Letters on the Truths contained in Popular Superstitions. By Dr. MAYO.

Bibliothèque du Médecin Practicien. Paris, 1849.

&c. &c. &c.

ANALYSES OF VOLS. I., II., & III. OF THE JOURNAL OF PSYCHOLOGICAL MEDICINE.

AUGUSTUS, the Emperor, cured of Melancholia by extract of lettuce. Asylums, private, former horrors of. St. Anne, Farm of, worked by the insane. Cowper, the poet, anecdote of. Camp Meetings, scenes attending. Convulsionnaires, account of, at the Tomb of Deacon Paris. Opium, reason why inefficient in Insanity. Opium Eating, description of effects. Offspring, how affected by character of Parents. Feigned Insanity. Religious Insanity. York, Retreat at. Report of. Impairment of Mind from Softening of the Brain, by Dr. WINSLOW. Idiotism induced by compression of the Skull. Idiots in Upper and Lower Canada. Idiots wandering in Ireland, intermarriages of. Imbecility induced by Solitary Confinement. Illusions and Visions of Swedenborg. Infants, heads of, deformities of, induced by their coverings, observations of FOVILLE on. Injury, severe bodily, cures a case of Melancholy. Insane, Lectures to, on the Physical Sciences. Insanity arising from fear of Cholera—from Prussic Acid—from Grief—from Mesmerism—from Tobacco. Insanity in America, among the Cherokees. Mortality from Insanity, according to ESQUIROL, PINEL, RAYMOND, TENON—in Northern States of America. Penitentiaries, their influence in producing Insanity. Presentiment of, in Dean Swift. Effects of Inhalation of Sulphuric Ether in Insanity. Religious Monomania of Samuel Johnson. Jeffrey's remarks on Swift's conduct to Varina. Jacobi on Compression of the Carotids in Insanity. Resuscitation from Death, instances of. Phenomena of Death. Restraint in Insanity, rational view of, and reasonable objections to *absolute non-restraint*. Transmission of most perfect forms of cerebral organization seldom occur in male line. Troubadours, their songs, theory of. Dr. SIGMOND on the Idiots of the Bicêtre. Strasburg, dancing Plague at. Dr. COWAN on Spiritualism. Song of the Idiots. Submersion, sensations from, described by Dr. CLARKE—agony of revival from. Depression of Skull, case of, inducing Monomania, cured by the Trephine. Objections to Large Dormitories, by Dr. CONOLLY. Considerations on Sleep and Death. Simulation of Disease among the Insane. Treatment of Idiots at Paris. School for Idiots at Boston. School for Idiots at Hanwell Lunatic Asylum, Middlesex. Interesting Reports of the individual cases of Idiots in the Hanwell School. Criminal Statistics of France. Food, full statement of kind and quantity of, at Hanwell Lunatic Asylum. Dreaming, its Physiology. Attendants on Lunatics, observations of Dr. CONOLLY on. Anecdote of Cullen in his last moments. Period of year at which Insanity is most liable to occur. Average duration of Insanity. Puerperal Insanity. Moral Treatment of Insanity. Paralytic Affections in connexion with Mental Diseases. Notes on the Parisian Lunatic Asylums. Bethlehem Hospital, statistics of. Physical character of the heads of the Insane, by Dr. BRIGHAM. Physical Injuries to the Brain, induce indiscriminately all the varied forms of Mental Disorders. Accidental Injury to Head of Insane Patient, restores his Mental Powers. Several cases of Idiotism said to be cured in consequence of a blow to the head. Case of Intellectual Powers improved by trepanning. Instinct of self-preservation lost in genuine Insanity. Sir HENRY HALFORD on importance of Medical Treatment of Insanity. Extraordinary calculating Powers of Idiots. Ambiguous nature of term, Moral Insanity, Commissioners of Insanity, difficulties of their duties, and extreme delicacy of.

Immediate Physical Cause of the Death of Christ, rupture of the heart. Curability of Insanity, how influenced by seasons. Painless nature of Suicide, attempted by Cowper, from suspension. Dr. CONOLLY on Restraint. FALRET on the same subject. Restraint not attended with additional security. Restraint often an exciting cause of Suicide. Errors of Religious Enthusiasts and Dogmatics. Cases illustrative of action of Morphia in Insanity. Dr. JOHN DAVY on Moral Responsibility. Extent to which the Moral Principle is affected in the different varieties of Insanity. Description of Religious Mania. Case of Mania in Child six years old. Mind, its morbid influence on the Body, and *vice versa*. Mind, how affected by the Weather. Dr. WIGAN on the Duality of the Mind. Mind, a First Principle, or Entity, Indivisible. The Peculiarities of the Pellagra. A whole Family the victims of Suicide. Bigotry of Innocent VIII. Notorious infamy of his Bull. John Hunter, summary notice of the extent of his knowledge of the Nervous System. Dr. William Hunter, his imperfect conception of the Nervous System. Homicidal Mania. Hysterical Mania. Head not always symmetrical. Case of Malformation of the Brain, by the late Dr. WIGAN. Statistics and Pathology of Mental Diseases. Verdicts of Juries in cases of plea of Insanity, altogether incompetent: remarks on, by Dr. Mayo. Vitality, in connexion with Electricity. General Chronic Palsy of the Insane — early symptoms of — duration of — prognosis in — complication of — pathology of—treatment of. Hope disappointed, features of, and traits of its effects on the mind. ARCHDEACON NARES on Phrenology. Use of the Body in relation to the Mind. LAWRENCE on the dissections of the patients in Bethlehem Hospital. Phosphatic, Earthy, and Alkaline Salts, predominance of, in Nervous Disorders. Anecdote of Talleyrand. Contagion of Mental Disorders. Lunatic Patients, their average expense in Public and Private Asylums. Letter from C. PEARSON, Esq., M.P., to the Editor. Hallucinations of Tasso. On Religious Errors of the Age. Ecstatic State from use of Indian Hemp (Cannabis Sativer.) BROUSSAIS on Organic Changes affecting the Intellect. Brain, the Anatomy of its development, by Mr. SOLLY. Effects of Atropa Belladonna on the Brain. Proportion of Cases of Insanity arising from Puerperal Causes. ESQUIROL on Hereditary Insanity. Case of Feigned Insanity, described by Dr. CONOLLY, illustrating the difficulty of the Diagnosis. The effects of the Cannabis Indica described. CRUVEILHIER, important remark of. Case of Absence of one of the Hemispheres of the Brain. Criminal Lunatics, proposed regulations regarding. Singular Case of Consciousness suspended for a year, restored after operation of the Trephine; with Sir ASTLEY COOPER'S Remarks. Singular Case of Intermittent Insanity. Hereditary Isanity apt to appear at same period in Children as in Parents. On Political and Epidemic Insanity. The Cataleptic State. Dreaming, Pathology of, by EVELYN. Psychology, important Works and Memoirs on, published on the Continent. Supposed Case of Demoniacal Possession, described by the present sufferer. Paganini, what his talent cost him. La Folie Raisonnante. LORD BROUGHAM on Partial Insanity. German Pantheism. PINEL, triumphant success of, in removing Restraint from the Insane. Poetic character, relation of, to the Insane state. Physical properties of matter essentially *vital*, according to COLERIDGE. Punishment, corporeal, still employed in Grand Cairo. Pantheism of Ancients. Pantheism of Philosophy and Poetry distinguished. Physical and Metaphysical conditions mutually opposed. Physiology intermediate between Physical and Metaphysical Sciences. Idiopathic Palsy. Visions of Tasso. Reverie of Tartini. Theomania of Jeanne d'Arc. Physiology of Reproductive Functions by LALLEMAND. LABATT on the use and abuse of Restraint in the Treatment of the Insane. Renovation of Body at Climacteric Periods. Rational View of Restraint, and judicious Objections to Non-Restraint, by Managers of Bloomingdale Asylum, New York. Religious Melancholy of Cowper. Anecdotes of early life of Coleridge. Peculiar character of his Metaphysical Philosophy. The Soul an essence distinct from that of either Life or Mind. Cause of the Death of Shakspeare. Effect of Non-Restraint in diminishing the frequency of Suicides. KANT on the Double Origin of Ideas. Chymical Indications of Cerebral Congestion from the state of the Blood. Contrast between the Poets and Sir Walter Scott. The Statistics and History of Bloomingdale Asylum, New York. The Philosophy of Spinoza and its effects. Remarkable Vitality of Seeds. Lunatic Asylums formerly used as Show Rooms. Insanity of Swift. Unsuccessful attempt of Wilde to establish his Sanity. Brief estimate of his character as a Literary Writer and Poet. Dryden's notion of him. Dr. WINSLOW on the effects of Solitary Confinement on the Mind. Pecu-

liarities in character of Minds disposed to Suicide. Song, the natural outburst of misplaced and hapless affection. The Misdeeds of Sorcery in the Fifteenth Century. The Diffusion and Progress of Sorcery. Identity of mental character of Sorcerers with the Hallucinations of the Insane amongst the moderns. Personal Appearance of Stella, drawn by Sir Walter Scott. Fashionable Amusement at Lima. Revolution in Management of Lunatic Asylums altogether of recent date. The Formulæ of Logic not suited to Melancholic Patients. General Principle of Non-Restraint, first adopted at the Lincoln Lunatic Asylum. Modified forms of Crania from tight bandaging; illustrated by Plates. Cases illustrative of Transient Insanity. Description of Lunatic Asylum at Cairo. The History of Mental Epidemics, by CALMIEL. The Juvenile Delinquency and Degeneration of Upper Classes of Society. Married Condition strictly consonant with Nature. Death-bed Scenes portrayed. Time of Death often anticipated and preparation made against. Demonomania, Historical and Pathological Account of. Religion considered as a moral cause of Insanity. Opinion of Dr. RUSH of liability of different sexes to Insanity. Traits in the character of the late Lord Dudley. On the Physical Expression of Disease. Delirium Tremens, report of, as it appeared in Bloomingdale Asylum, New York. Hopeless character of, generally. The Brain the centre of the Nervous System. History of the Lunatic Asylum at Nantes. Description of Charity Hospital at New Orleans. The vile and vicious Practices of Nurses. Respiratory Tract of Nerves of Sir Charles Bell called in question. Nervous influence not identical with Galvanism. The Hallucinations of Genius, two forms of. David Hume, on danger to Reason, from want of due control of the Imagination. HEBERDEN on the lucid interval in frenzy preceding Death. Character of Mulattoes. Differences between Mulattoes of Spanish or French extraction with Negro and Anglo-Saxon. Mania a potu rare amongst Spanish, French, and Negroes. Violation of the Moral Laws. Belief of Existence of Mind and Matter rest on the same principles. Mortality amongst Men of Genius. The Insanity of Men of Genius. Case of Melancholy cured by severe bodily injuries. ABERCROMBIE on Phantasms of the Brain. AUBANEL on the False Membranes of the Arachnoid. The Association of Nerves. Reflections on Jeanne d'Arc. Absurd and dangerous fancies of the Dark Ages. Dr. BARCLAY on Life and Organization. Definition of Life by BICHAT, by COLERIDGE. Lallemand, extreme and widely extended range of subjects treated by him. Apology for the Nerves, by LEFEVRE. Effects of Blood Pressure on a Nerve, according to BICHAT. Chymical Analysis of the Blood in the Neuroses. Curious anecdote of a rational old lady. Amendments of the Law of Lunacy, remarks on, by Dr. WINSLOW. Five Propositions submitted by the House of Lords for the Security and Protection of Insane in Ireland. Defective state of the Law of Lunacy in Ireland. Traits of the impetuous character of Byron. Theory of the Poetic Temperament of Burns. Injurious Effects of Tight Bandages on the Brain. British Journal of Psychological Medicine, by Dr. Winslow, encomium of, by the Societé Medico-Psychologique de Paris. Report of the Hanwell Lunatic Asylum. Case of Double Consciousness in Hysteria. Dr. BEATTY on Persons found Dead. Certain singular Products of Ulvas (Conferva) observed and described by BORY DE ST. VINCENT. Vital Principle opposed to usual action of physical agents on organic functions. Vitality of Fish after being congealed. Depressed state of Vital Powers in Young, from sleeping with the Aged. Voltaire on Demoniacs. Phantasms of a Haunted Man, by Dr. WIGAN. Genius, its melancholy alliance with misfortune. Early germs of Genius. Eccentricity of Genius. Irritability of Genius. Professor WHEWELL's opinion on relation between Conception and Definitions. Göthe, wild dithyrambic of, on Pantheism. No proof whatever of spontaneous or equivocal generation. Three cases of Insanity from Novel Reading. Very wide diffusion of Madness, if credence be given to popular language. Spermatorrhœa, endless frauds of designing empirics in the treatment of: perfect cure of, by application of nitrate of silver. Compression of the Head in early life, absurd habit of the French. Edilin, Doctor of the Sorbonne, first open Preacher against Sorcery. His Punishment. France, Suicides in. Fichte, his fundamental Principles of Philosophy. Extensive and gross Delusions of the Fifteenth Century. Ehrenberg denies any unequivocal instance of Spontaneous Generation. Grand Principle of Equalization in Nature. On Hypochondriasis. The Law of Lunacy. On Suicides and Verdicts of Felo-de-se. Politics and Insanity. Autobiography of the Insane. On Cretinism. Capital Punishments. British Lunatic Asylums. Analysis of Crime. The Passions Medically considered. Treat-

ment of Insanity, ancient and modern. Moral State of Society. Anatomy of the Human Brain. Insanity of Advanced Life. Annals of Medico-Psychology. Dr. Hitchman on the Pathology of Insanity. The Human Mind in some of its Medical Aspects. Insanity from the use of Chloroform. Supposed Demoniacal Possession. Religious Insanity. Causes, cure, and prevention of Idiocy. Dr. Davy's Mental Pathology. On restraint and seclusion in the treatment of the Insane. Popular errors relative to Insanity. Rational treatment of the incurable Insane. Physiology of the Brain. Colney Hatch Asylum. French Law of Lunacy. Dyce Sombre on the English Law of Lunacy. Case of Pyromania. History and present state of Lunatic Asylums. Moral treatment of the Insane. Homicidal Insanity. Confessions of the Insane. Sudden recovery from Insanity. Statistics of American Hospitals. Mixed Insanity, or Reason and Madness. Notes of a recent visit to several French Asylums. On Tædium Vitæ. Morbid Anatomy of the coverings of the Brain. Trial of Pate.

CRITICAL OPINIONS.

The Lancet.

"The first number of this Journal elicited from 'The Lancet' (vol. i. 1848, p. 234) this remark, that in it there was 'no lack of materials, no deficiency of interest or instruction.' On the publication of a third quarterly number, with further opportunities before us of estimating the capabilities and prospects of our new contemporary, we spoke in still stronger terms of approval of the mode in which it had been conducted, and of commendation to the notice of our readers, ('The Lancet,' vol. ii. 1848, p. 313.) There therefore remains now very little more to do than to announce the publication of the first annual volume, consisting of four quarterly numbers of the JOURNAL OF PSYCHOLOGICAL MEDICINE, in a very convenient and handsome form. It contains, under their respective headings, a series of elaborate analytical reviews of original communications of interest and importance, on subjects connected with mental diseases,—of translations from foreign languages,—of cases illustrating various points in the law of insanity,—including miscellaneous notices and correspondence on subjects connected with the objects of the journal. It would be invidious to name particular essays or persons where all obtain excellence. Suffice it, therefore, to say, that Dr. Winslow has proved himself qualified for the performance of the onerous duties which he has undertaken; and he has been very fortunate in the choice of his fellow-labourers. No one can doubt the necessity of devoting a large share of attention to the investigation of cerebral diseases—a share beyond that which could be appropriated to their study in the pages of the journals which include the extended field of pathology at large; there therefore is abundant room for occupation by a journal such as the one before us. This place could not have been better filled than it is at present, and there can be no doubt that Dr. Winslow's successful labours will be suitably appreciated by all who take an interest in the pathology and treatment of diseases of the brain."

The Medical Gazette.

"Dr. Winslow deserves great credit for the ability and perseverance which he has displayed in editing the JOURNAL OF PSYCHOLOGICAL MEDICINE. There is no one of the numbers yet published which does not contain papers of great value in reference to mental pathology; and the articles on the medical jurisprudence of insanity are particularly deserving of perusal. We have reason to know that this journal is now consulted by lawyers on the subject of homicidal insanity; and medical practitioners, who venture to give evidence on trials for murder, must be prepared for a close investigation into their acquaintance with modern medical doctrines. Although the journal is devoted specially to the subject of insanity, it is really deserving of the support of all medical men who take an interest in the progress of medical science."

The Medical Times.

"We have great pleasure in directing the attention of all those who take an interest in the study of the vast and interesting field of mental phenomena to Dr. WINSLOW'S JOURNAL. Many of the articles which it contains are of great value, whether analyzed as scientific or literary productions. It has also a charm, which is not always the distinguishing feature of quarterly periodicals,—it presents a feast of rich variety to the reader, and often with so much taste, elegance, and solid instruction, that in perusing its pages we are apt to forget we are in the depths of profound philosophical research, enjoying the luxury of clear and comprehensive views on matters of the greatest possible importance to the diversified interests and relations of humanity. Hitherto such subjects have generally been treated in

a manner rather to repel than to attract. In this instance, the edge of the cup is not only sweetened, but the contents of it are often so happily blended, that there are few persons, whether learned or otherwise, but what would take off the whole, not at a draught, but in small and repeated doses, and regret that the quantity had not been greater. A felicitous mixture of variety, displaying taste, learning, and accurate information, is certainly one of the characteristics of the journal, and ought, and we trust will, secure for it a deservedly wide circulation. It has a value, however, to which we have not yet alluded. It is the first work of the kind published in this country, and opens up inquiries unquestionably amongst the most important that can engage the attention of man. It must give an impulse to thought, the fruits of which are not at present easy of calculation. . . . Dr. Forbes Winslow is a judicious and enterprizing pioneer, and we extend to him our sincere mite of approbation. We will cheer him on his way, in the hope to help him. He has one of the most essential qualities of an able editor; he has the taste and judgment to connect himself with those who are the best fitted to carry out his views. It is no small merit for one in his position to distinguish and secure those talents, in the co-operation of his labours, which are peculiarly qualified for the onerous task he has imposed on himself."

London Journal of Medicine.

"We cordially recommend this quarterly periodical to all who are interested in the important, and often intricate, questions which arise in connexion with the abnormal condition of the human mind. Dr. Winslow's literary qualifications, combined with his daily occupation in the successful treatment of the insane, eminently qualify him for the office of editor; and judging from the general excellence of the articles in this volume, we infer, that the staff of contributors is not unworthy of their leader. The papers consist of Analytical Reviews; Original Memoirs; Translations; Trials bearing upon the medical jurisprudence of insanity; Miscellaneous Notices; and Correspondence. In succeeding Numbers we expect to have frequent occasion, in the 'Digest of the Journals,' to introduce to our readers valuable information, gleaned from Dr. Winslow's pages."

Westminster Review.

"Under the able editorship of Dr. Winslow."

The Globe.

"This Journal stands by itself in British periodical literature. It interferes with no existing magazine. It takes under its special and exclusive care the higher and more ennobling department of medical philosophy—that which deals with the spiritual portion of our being, and demonstrates how intimately associated are the *physical* and *mental* parts of man's mysterious organization. The subject of medical metaphysics never before was so ably, so philosophically, and so practically treated. The practical tendency of all the articles is one of their great recommendations. Dr. Winslow has successfully established that it is possible to throw a fascinating charm about the driest and apparently the most abstruse and uninteresting sections of scientific research—viz., the philosophy of the human mind. The essays on the disorders of the mind are replete with valuable practical facts, and establish that Dr. Winslow possesses something beyond a mere theoretical and book knowledge of the human mind in its healthy and deranged state. Engaged actively for many years in investigating the wonderful changes which the intellect undergoes when under the dominion of disease, and in administering, by means of physical and moral agents, to the cure and alleviation of mental derangement at the bedside of those afflicted with the most appalling of human maladies, we are not astonished at the degree of attention which we understand Dr. Winslow's practical observations on the medical, moral, and judicial treatment of the insane have received at the hands of the British and Foreign physiologists."

Dublin Quarterly Journal of Medicine.

"The Quarterly 'JOURNAL OF PSYCHOLOGICAL MEDICINE AND MENTAL PATHOLOGY,' edited by DR. FORBES WINSLOW, continues to uphold the high character which it attained at its commencement. The numbers for April and July are rich in valuable matter. Altogether this periodical is one which is eminently deserving of the 'golden opinion' it has won for the able and honest spirit in which it is conducted. We heartily wish it every success, and strongly recommend it to the notice of those engaged in the particular line of professional practice to which it is specially devoted."

*** *Published, Vols. I. II. and III. of* THE JOURNAL OF PSYCHOLOGICAL MEDICINE, *with copious Indices.*

LONDON: JOHN CHURCHILL, PRINCES STREET, SOHO.

Savill and Edwards, Printers,] [4, Chandos Street, Covent Garden,
